

SAPAN MOZAMMEL (Mozammel Ali)

FRONTEND DEVELOPER

sapanmozammel@gmail.com | sapan-dev.vercel.app | linkedin.com/in/sapanmozammel | github.com/SapanMozammel | +88 01627134085 | Dhaka, Bangladesh · Remote

SUMMARY

Product-minded frontend developer with **6+ years** shipping React, Next.js, and TypeScript applications for SaaS, AI, and developer-tool companies serving **6M+ users across 180+ countries**. Experienced designing v1 frontend foundations, re-architecting complex admin panels, and integrating REST/GraphQL APIs with strict typing, accessibility, and performance discipline. Available for full-time remote; EOR / contractor-friendly; 30-day notice.

PROFESSIONAL EXPERIENCE

Frontend Developer, Startise Jun 2024 — Present
Dhaka, Bangladesh · Full-time

- Architected and shipped the **v1 frontend for xCloud**, a cloud hosting platform — designed component structure, state model, and API integration patterns that scale with the team.
- Delivered **Templately** across the admin SPA, Next.js marketing site, and WordPress plugin — three React surfaces against a shared GraphQL API.
- Built typed, reusable UI primitives in **React 19 + TypeScript + Tailwind CSS**, reducing duplicate component code across products.
- Translated Figma specs with pixel-level fidelity including hover and transition intent; collaborated daily with backend, design, and product teams.

Frontend Developer, WPDeveloper Nov 2020 — May 2024
Dhaka, Bangladesh · Full-time

- Delivered admin frontends for **BetterDocs, NotificationX, SchedulePress, BetterLinks**, and WPDeveloper Store — a plugin suite with **6M+ active installations across 180+ countries**.
- Re-architected the BetterDocs admin panel** and built its analytics dashboard + FAQ Builder; UX improvements measurably reduced support-ticket volume.
- Established the frontend foundation for BetterLinks** as the first frontend developer on the project.
- Built rich content editors (Draft.js, QuickBuilder), analytics dashboards (ApexCharts), and complex admin workflows across React + Redux + WordPress REST APIs.

Junior Frontend Developer, Easy.Jobs Feb 2020 — Oct 2020
Dhaka, Bangladesh · Internship

- First frontend developer** on an AI recruiting SaaS — scaffolded the Vue.js + Laravel frontend that the team still extends today.
- Built public career-site interfaces and interactive recruiter dashboards with ApexCharts.
- Defined reusable Vue component patterns that accelerated feature delivery for follow-on engineers.

FEATURED PROJECTS

react-render-kit — TypeScript · React.js · npm Open-source React utility library for conditional and list rendering.

TubeOnAI — Next.js · React Query · Firebase AI content-repurposing platform for videos, podcasts, PDFs.

xCloud — Vue 3 · Vite · Laravel API V1 frontend architecture from empty repo to production.

Easy.Jobs — Vue.js · Bootstrap · Laravel First frontend dev — shipped v1 of an AI recruiting SaaS.

sapan-dev.vercel.app — Next.js · Redux.js · Three.js Portfolio, 16 locales incl. RTL Arabic, server-component-first.

Templately — Next.js · Redux · GraphQL Three React surfaces sharing one GraphQL API.

BetterDocs — React · Draft.js · ApexCharts Re-architected admin panel, analytics dashboard, FAQ Builder.

+ 4 More — React · Redux · WordPress NotificationX, BetterLinks, SchedulePress, WPDeveloper Store.

EDUCATION

B.Sc. in Computer Science & Engineering Sep 2018 — May 2022
Daffodil International University, Dhaka, Bangladesh · 145 credits

Diploma in Computer Engineering 2014 — 2017
Brahmanbaria Polytechnic Institute, Brahmanbaria, Bangladesh

TECHNICAL SKILLS

React 19	Next.js 16	TypeScript	Vue.js
Redux Toolkit	React Query	GraphQL	REST APIs
Zod	React Hook Form	Tailwind CSS	SCSS
shadcn/ui	Framer Motion	GSAP	Three.js
Node.js	Prisma	MongoDB	Firebase
Jest	Playwright	Vitest	Vercel
Docker	CI/CD	WordPress	Figma
Design Systems	Accessibility (WCAG)	i18n / RTL	Core Web Vitals

ADDITIONAL INFORMATION

- Languages:** English (Professional), Bengali (Native)
- Certifications:** Artificial Intelligence & Machine Learning (Bangladesh Computer Council, ICT Division, 2021); Interactivity with JavaScript (University of Michigan, 2020); Advanced Mobile Game Development (ICT Division, 2017); Mobile Game Graphics Design (ICT Division, 2017).
- Strengths:** Frontend architecture & design systems; Performance & Core Web Vitals; Accessibility (WCAG, ARIA, RTL); Figma → code with pixel fidelity; Async remote collaboration; Clean, typed, maintainable code.
